

Let's organize a European movement against ReArm Europe! Join us!

"We oppose the EU's plans to spend an extra €800 billion on arms. This will be €800 billion stolen. Stolen from social services, health, education, labour, peace building, international cooperation, from a just transition and climate justice. It will only benefit arms manufacturers in Europe, in the USA and elsewhere.

It will make war more likely, and the future less safe for everyone! It will generate more debt, more austerity, more borders. It will deepen racism. It will fuel climate change. We do not need more weapons; we do not need to prepare for more wars. What we need is a totally different plan: real, social, ecological and common security for Europe and for the world."

Stand up against war. Stop ReArm Europe.

These organizations are the first supporters of the campaign.

We invite all organizations to join and be part of this movement. We want to showcase the logos and names of all those who sign on and resist ReArm Europe.

Join us!
