

“We present in this space THE WOMEN’S PLATFORM FOR INCLUSION IN EUROPE, a virtual environment shared between municipalities, local governments and young people themselves based on non-formal innovative pedagogies, participatory management between technicians and young people themselves, the development of materials and tools learning as well as the effective use of information and communication technologies (ICT) in youth.

This tool is the result of the work and analysis of six European entities with the clear objective of facilitating their social inclusion through the employability and empowerment of young women by creating a network with local and regional governments.
